Doro's French VAT receivable now recovered

In Doro's report for the third quarter of 2010, the company stated that increased sales volumes and the delayed recovery of VAT in France were the principal causes behind Doro's reported negative cash flow of SEK 21.2 m.

The delay arose due to a change in procedures in connection with the Doro Group's transition to its new streamlined organization and legal structure as of January 1, 2010. The VAT receivable in France, which amounted to SEK 23.8 m, has now been repaid to Doro in full. Following this, the Group's future VAT procedures in France are expected to have been normalized.
